

APPENDIX D

**IN THE UNITED STATES DISTRICT COURT
FOR THE WESTERN DISTRICT OF TEXAS
WACO DIVISION**

WSOU INVESTMENTS, LLC d/b/a BRAZOS
LICENSING AND DEVELOPMENT,

Plaintiff,

v.

DELL TECHNOLOGIES INC., DELL INC.,
and EMC CORPORATION,

Defendants.

Case No. 6:20-cv-00477-ADA

JURY TRIAL DEMANDED

**LETTER OF REQUEST: REQUEST FOR INTERNATIONAL JUDICIAL ASSISTANCE
PURSUANT TO THE HAGUE CONVENTION OF 18 MARCH 1970 ON THE TAKING
OF EVIDENCE ABROAD IN CIVIL OR COMMERCIAL MATTERS**

GREETINGS:

1. Sender	The Honorable Judge Alan D Albright, District Judge United States District Court for the Western District of Texas, Waco Division 800 Franklin Avenue Room 301 Waco, Texas 76701 USA
2. Central Authority of the Requested State	Rechtbank Den Haag Sector Civiel & Algemene Zaken Postbus 20302 2500 EH THE HAGUE The Netherlands evidence.convention.rb.den.haag@rechtspraak.nl
3. Person to whom the executed request is to be returned	This Court; representatives of the parties as indicated below; the witnesses from whom evidence is requested as indicated below.
4. Specification of the date by which the requesting authority	June 1, 2021

requires receipt of the response to the Letter of Request	
---	--

In conformity with Article 1 of the Hague Convention on the Taking of Evidence Abroad in Civil or Commercial Matters (the “Convention”), the undersigned has the honor to submit the following request. This Court respectfully requests that the District court of The Hague, the Netherlands, which has been designated pursuant to the Convention as the Dutch Central Authority, through your usual and proper process, compel the appearance of the Dutch individuals (i) Mr Antonius Mathias Johannes Maria van den Boom (ii) Mr Willem Hendrik Michel van Oordt and (iii) Mr Antonius Jacobus van der Geest, each duly authorized to represent Nokia Solutions & Networks B.V., a private limited liability company (*besloten vennootschap met beperkte aansprakelijkheid*) under the laws of the Netherlands, trade register number 34259706 (the “**Company**”) as statutory director (*statutair bestuurder*) of the Company (collectively referred to as “**Authorized Representatives**” and each an “**Authorized Representative**”) to give evidence for use at the trial of the above-captioned matters. In addition, this Court requests that the Court of The Hague requires each Authorized Representative of Nokia Solutions & Networks B.V. to produce copies of specific documents in his possession, or which he has at his disposal, for inspection. Since, according to Dutch case law, the Convention cannot provide more possibilities than national law, the undersigned emphasizes that this Letter of Request seeks the use of the Dutch national procedures relating to document production in conformity with Article 843a of the Dutch Code of Civil Procedure (“DCCP”).

Article 843a DCCP requires that the applicant has a legitimate interest in the production of such documents, and also that the requested documents are related to a legal relationship to which the applicant or its legal predecessor is a party. It is not required that the person who has to produce

documents is a party to the aforementioned legal relationship.¹ Furthermore, the application should pertain to specific documents, in which context it is noted that the documents need not be designated individually: a general description of documents pertaining to a specific subject matter regarding a certain time frame² or a file and the involved persons and/or authorities may qualify as sufficiently specific.³

Regarding the first requirement, the applicant Defendants have a legitimate interest in the requested documents because these documents are necessary for a full and fair determination of the validity and enforceability of the Patents in Suit. In this context, the undersigned also refers to section 8 (subsection and b) from this Request for additional information on the interest of applicant Defendants in the production of the relevant documents. Applicant Defendants are parties to legal proceedings alleging patent infringement pending in the United States. According to article 1019a DCCP, unlawful acts such as an alleged patent infringement are considered to be a legal relationship within the meaning of Article 843a DCCP. Under Article 843a DCCP documents can also be requested with a view to foreign legal proceedings.⁴ Finally, applicant Defendants request access to specific documents, as listed in Exhibit D1.

For reasons of completeness, it should be noted that section 4(a) of article 843a DCCP provides that a party controlling documents that should be produced shall not be obliged to do so if there are overriding interests not to do so or if it can be assumed that justice can be properly administered without the requested documents. However, in the context of intellectual property

¹ See Supreme Court of the Netherlands 10 July 2015, *RvdW* 2015/1410.

² See, e.g., District Court Rotterdam 1 April 2009, BI1747.

³ See Supreme Court of the Netherlands 26 October 2012, *NJ* 2013/220 (*Theodoor Gillissen Bankiers N.V.*).

⁴ Supreme Court of the Netherlands 8 June 2012 (*Abu Dhabi Islamic Bank vs. ABN AMRO*), ECLI:NL:HR:2012:BV8510.

disputes, Article 1019a section (3) provides that section (4) of Article 843a DCCP is not applicable. At the same time, Article 1019a (3) DCCP provides that the application shall be refused if the confidentiality of any confidential information is not safeguarded. In this context it is noted that the Defendants shall not use the documents for any purpose other than the present litigation, and are prepared to give further undertakings if the Dutch Court deems necessary in the interests of the parties involved.

This request is in the interests of justice, as the requested deposition and documents are necessary for a full and fair determination of the matters in issue between the parties in the proceeding pending in this Court.

5. a. Requesting Judicial Authority (Article 3, a)	The Honorable Judge Alan D Albright, District Judge United States District Court for the Western District of Texas, Waco Division 800 Franklin Avenue Room 301 Waco, Texas 76701 USA
b. To the competent Authority of (Article 3, a)	The Netherlands

Beethovenstraat 400 1082 PR Amsterdam Netherlands Tel: +31 20 71 71 821 Fax: +31 20 71 71 335 Email: annemarie.verschuur@nautadutilh.com</p>
c. Other parties	N/A
Representatives	N/A
7. a. Nature of the proceedings (divorce, paternity, breach of contract, product liability, etc.) (Article 3, c)	Civil action alleging patent infringement under the patent laws of the United States.
b. Summary of complaint	Plaintiff alleges that it is the sole owner of all rights, title, and interest in, <i>inter alia</i> , the following United States patent: U.S. Patent No. 7,453,489 (the “489 patent”), titled <i>Stackable virtual local area network</i>

	<p><i>provisioning in bridged networks</i>, which issued on November 18, 2008.</p> <p>Plaintiff alleges that the Defendants infringe the '489 patent and seeks money damages.</p> <p>Discovery sought in this Letter of Request is relevant in Case No. 6:20-cv-00477-ADA.</p>
<p>c. Summary of defense and counterclaim</p>	<p>In defense against WSOU's claims of patent infringement of the '489 patent, Defendants assert, <i>inter alia</i>, that they do not infringe any of claims of the '489 patent, directly or indirectly, and that the claims of the '489 patent are invalid unenforceable.</p> <p>Each Authorized Representative of Nokia Solutions & Networks B.V. has knowledge of the facts relevant to Defendants' defenses. Each Authorized Representative of Nokia Solutions & Networks B.V. is relevant to the action by virtue of being a former assignee of the '489 patent. Each Authorized Representative of Nokia Solutions & Networks B.V. holds critical facts to this case, including facts relevant to a number of defenses raised by Defendants and any potential damages, including information related to the prosecution of the '489 patent; prior uses and/or sales or products and services incorporating the '489 patent, publications related to the concepts claimed in the '489 patent; commercialization, production and/or commercial embodiments related to the '489 patent; the state of the art at the time of the alleged invention and/or filing of the applications related to the '489 patent; the ownership and financial interests in the '489 patent; conception, diligence and/or reduction to practice of the concepts claimed in the '489 patent; and the disclosure of the claimed invention of the asserted patent. As well as licensing of and/or agreements covering the '489 patent. And, financial knowledge including valuation and royalties associated with the '489 patent or any license and/or agreement covering the '489 patent; and other financial interests (including revenue, costs, expenses and profits) as well as financial interests and information related to the '489 patent.</p>

<p>d. Other necessary information or documents</p>	<p>Nokia Solutions & Networks B.V., having its statutory seat in the Hague and its registered office address at Antareslaan 1, 2132 JE Hoofddorp, the Netherlands, is a former assignee of the '489 patent.</p> <p>Because the validity of the '489 patent is a critical issue in this proceeding, this Court is endorsing Defendants' request to take the deposition testimony of each Authorized Representative of Nokia Solutions & Networks B.V. and require each Authorized Representative of Nokia Solutions & Networks B.V. to produce specific documents in his possession, or which he has at his disposal.</p> <p>Nokia Solutions & Networks B.V.'s current registered office address is:</p> <p>Antareslaan 1 Hoofddorp, 2132 JE, the Netherlands</p> <p>Authorized Representatives: Antonius Mathias Johannes Maria van den Boom IJweg 1189, 2133 MJ Hoofddorp, The Netherlands</p> <p>Willem Hendrik Michel van Oordt Rijksboom 90, 3071 AX Rotterdam, The Netherlands</p> <p>Antonius Jacobus van der Geest Laurentiusweer 21, 2265 DD Leidschendam, The Netherlands</p>
<p>8. a. Evidence to be obtained or other judicial act to be performed (Article 3d),</p>	<p>In order to present their defenses that the '489 patent is not infringed, invalid, and unenforceable, Defendants require access to highly relevant evidence in the possession of each Authorized Representative of Nokia Solutions & Networks B.V. regarding the conception and reduction to practice of the invention claimed in the '489 patent. In particular, Defendants have a reasonable interest in determining when the claimed inventions were conceived and reduced to practice. Finally, it is important for the position of Defendants that the roles and contributions of each Authorized Representative of Nokia Solutions & Networks B.V. , and any others to the conception</p>

	<p>and/or reduction to practice of the invention claimed in the '489 patent are clarified.</p> <p>Defendants request the production of certain relevant documents that are, or most likely are, in the possession each Authorized Representative of Nokia Solutions & Networks B.V., or which he most likely has at his disposal. A list of the requested documents is attached as Exhibit D1.</p> <p>To further clarify the evidence sought, attached as Exhibit D2 is an outline of the topics and issues about which counsel for Defendants intends to inquire of each Authorized Representative of Nokia Solutions & Networks B.V.</p>
<p>b. Purpose of the evidence or judicial act sought</p>	<p>With respect to the '489 patent, each Authorized Representative of Nokia Solutions & Networks B.V. has information and knowledge relating to the prosecution of the '489 patent; prior uses and/or sales or products and services incorporating the '489 patent, publications related to the concepts claimed in the '489 patent; commercialization, production and/or commercial embodiments related to the '489 patent; the state of the art at the time of the alleged invention and/or filing of the applications related to the '489 patent; the ownership and financial interests in the '489 patent; conception, diligence and/or reduction to practice of the concepts claimed in the '489 patent; and the disclosure of the claimed invention of the asserted patent. As well as licensing of and/or agreements covering the '489 patent. And, financial knowledge including valuation and royalties associated with the '489 patent or any license and/or agreement covering the '489 patent; and other financial interests (including revenue, costs, expenses and profits) as well as financial interests and information related to the '489 patent.</p> <p>This evidence is directly relevant to Defendants' claims that the '489 patent is not infringed, invalid, and unenforceable and to determine any alleged damages under United States patent law.</p>

<p>9. Identity and address of any person to be examined (Article 3, e)</p>	<p>Nokia Solutions & Networks B.V. Antareslaan 1 Hoofddorp, 2132 JE, The Netherlands</p> <p>Authorized Representatives: Antonius Mathias Johannes Maria van den Boom IJweg 1189, 2133 MJ Hoofddorp, The Netherlands</p> <p>Willem Hendrik Michel van Oordt Rijksboom 90, 3071 AX Rotterdam, The Netherlands</p> <p>Antonius Jacobus van der Geest Laurentiusweer 21, 2265 DD Leidschendam, The Netherlands</p>
<p>10. Questions to be put to the persons to be examined or statement of the subject matter about which they are to be examined (Article 3, f)</p>	<p><i>See Exhibit D2</i></p>
<p>11. Documents or other property to be inspected (Article 3, g)</p>	<p><i>See Exhibit D1</i></p>
<p>12. Any requirement that the evidence be given on oath or affirmation and any special form to be used (Article 3, h)</p>	<p>We respectfully request that the testimony be taken under oath.</p>
<p>13. Special methods or procedure to be followed (e.g. oral or in writing, verbatim, transcript or summary, cross-examination, etc.) (Article 3, i) and 9)</p>	<p>This Court respectfully requests that each Authorized Representative of Nokia Solutions & Networks B.V. be summoned by the executing court to appear in court to be heard.</p> <p>This Court respectfully requests that the executing authority commission one of the United States Counsel for Defendants as a private examiner to ask questions about the topics laid down in Exhibit D2, under supervision of a Dutch magistrate judge, and to pose such further questions as may be warranted by the answers given by each Authorized Representative of</p>

Nokia Solutions & Networks B.V. The Court further requests that the judge presiding over the questioning of each Authorized Representative of Nokia Solutions & Networks B.V. permit representatives of the parties listed above in Section 6 to attend and to ask follow-up questions and cross-examine each Authorized Representative of Nokia Solutions & Networks B.V. at the culmination of the initial examination, as may be warranted by the answers given during the initial examination.

This Court respectfully requests that the testimony be taken in English, and that if needed, a translator be permitted to attend and translate any questions asked or testimony elicited by the examiner(s) during the deposition.

This Court respectfully requests that the examination be (partially) conducted via video conference to allow U.S. counsel to join the hearing.

This Court further requests that the testimony be recorded on videotape, and that a court reporter be permitted to attend the deposition and create a verbatim written transcript of the proceedings.

This Court further requests that each Authorized Representative of Nokia Solutions & Networks B.V. be directed to produce the documents identified in the attached Exhibit D1 not later than three weeks before the date of the examination.

This Court further requests that all books, papers, and other documents or articles that each Authorized Representative of Nokia Solutions & Networks B.V. identifies at the oral examination be marked as exhibits and attested. We respectfully requests that you return all such materials under cover duly sealed and addressed to the Netherland counsel:

Barbara F.H. Rumora-Scheltema

NautaDutilh N.V.

Beethovenstraat 400

1082 PR Amsterdam

The Netherlands

Tel: +31 20 71 71 449 |Fax: +31 20 71 71 361

	<p>Email: barbara.rumora-scheltema@nautadutilh.com</p> <p>Anne Marie E. Verschuur NautaDutilh N.V. EXHIBIT D1

DOCUMENTS REQUESTED

Defendants Dell Technologies Inc., Dell Inc., and EMC Corporation, (collectively, “Defendants”) request the production of the documents described below.

DEFINITIONS

The following definitions are applicable to terms employed in responding to this request:

1. “Accused Product” or “Accused Products” shall refer to any device, product, or other thing that Plaintiff is permitted to accuse of infringing the Asserted Patent in this Action. A copy of the Complaint in case number 6:20-cv-00477-ADA is attached as Exhibit D3. In referring to any device, product, or other thing as an “Accused Product,” Defendants in no way communicate their agreement that it infringes the Asserted Patent.
2. “Action” shall refer to the above-captioned proceeding in the United States District Court for the Western District of Texas, with case number 6:20-cv-00477-ADA.
3. “Asserted Claim” shall refer to each claim of the Asserted Patent that Plaintiff contends Defendants infringe.
4. “Asserted Patent” shall refer to U.S. Patent No. 8,913,489 and any patent applications related thereto.
5. “Communication” shall mean, without limitation, any written, oral, or other transmission of information, including but not limited to emails.
6. “Complaint” shall refer to the Complaint (including exhibits) that Plaintiff filed on June 2, 2020 as docket number 1 in this Action, as may be amended.
7. “Concerning,” “refer(s) to,” “related to,” “reflecting,” and “relating to” shall mean directly or indirectly relating to, referring to, mentioning, reflecting, pertaining to, evidencing, illustrating, involving, describing, discussing, commenting on, embodying, responding to,

supporting, contradicting, or constituting (in whole or in part), as the context makes appropriate.

8. “Defendants” or “Defendant” shall refer to Dell Technologies Inc., Dell Inc., and EMC Corporation, and any and all of their then-current or prior subsidiaries, parents, affiliates, divisions, successors, predecessors, agents, employees, representatives, directors, officers, trustees, and attorneys, or any other person or entity acting in whole or in part in concert with any of the foregoing, directly or indirectly.
9. “Document” shall include, without limitation, all documents, electronically stored information, and tangible things within the scope of the Federal Rules of Civil Procedure, including Rule 34. Federal Rules of Civil Procedure 34 permits discovery of: “(A) documents or electronically stored information—including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations—stored in any medium from which information can be obtained either directly or, if necessary, after translation by the responding party into a reasonably usable form; or (B) any designated tangible things.”
10. “Employee” shall refer to any officer, director, partner, employee, representative, or agent.
11. “Licensee(s)” shall refer to any entity having a license, assignment, covenant not to sue, or other understanding, written, oral or implied, that the entity has any rights to the Asserted Patent, any Related Patents, or any Related Applications, may practice one or more claims of the Asserted Patent and/or that Plaintiff will not file suit or otherwise enforce against that entity one or more claims of the Asserted Patent or any Related Patent or Related Application.

12. “Named Inventor” shall refer to any individual who is listed as an inventor on the Asserted Patent or any Related Patent or Related Application thereof.
13. “Person” shall refer to any natural person, firm, association, partnership, government agency, corporation, proprietorship, or other entity and its officers, directors, partners, employee, representatives, and agents.
14. The terms “Plaintiff,” and/or “WSOU” shall refer to the responding Plaintiff WSOU Investments, LLC d/b/a Brazos Licensing and Development, and any and all of its then-current or prior subsidiaries, parents, affiliates, divisions, successors, predecessors, agents, employees, representatives, directors, officers, trustees, and attorneys, or any other person or entity acting in whole or in part in concert with any of the foregoing, directly or indirectly.
15. “Prior Art” encompasses, without limitation, the subject matter described in each and every subdivision of 35 U.S.C. §§ 102 and 103, and includes, but is not limited to, memoranda, notes, manuals, interviews, testing data, disclosures, prototypes, correspondence, drawings, papers, articles, patents, printed publications, public uses, demonstrations, offers for sale or license, and sales.
16. “Related Application(s)” means any and all applications related to the Asserted Patent, including any provisional or non-provisional applications, continuations, continuations-in-part, divisions, interferences, reexaminations, re-issues, parents, foreign counterpart applications, and any other applications disclosing, describing or claiming any invention disclosed, described or claimed in the Asserted Patent, or claiming the benefit of the filing date of any application whose benefit is claimed in the Asserted Patent, whether or not abandoned and whether or not issued.

17. “Related Patent(s)” means any and all U.S. or foreign patents based upon or related to any Related Application(s) or Asserted Patent, including any patents or applications that may have been opposed, reexamined, re-issued or subjected to any validity or nullity proceeding.
18. “Third Party” shall refer to any person other than Plaintiff or Defendants.
19. “You,” “Your,” “Yours” shall refer to each Authorized Representative of Nokia Solutions & Networks B.V., and any and all of its then-current or prior subsidiaries, parents, affiliates, divisions, successors, predecessors, agents, employees, representatives, directors, officers, trustees, and attorneys, or any other person or entity acting in whole or in part in concert with any of the foregoing, directly or indirectly.
20. “Product(s)” means a machine, manufacture, apparatus, device, instrument, mechanism, appliance, software, service, process, or an assemblage of components/parts (either individually or collectively) that are designed to function together electronically, mechanically, or otherwise, including any offered for sale or under development.
21. Any pronouns shall be construed to refer to the masculine, feminine, or neutral gender, in singular or plural, as in each case is most appropriate.
22. The singular form of any word shall be construed to also include the plural, and vice-versa.
23. The word “each” shall be construed to mean “each and every.”
24. The words “and” and “or” shall be construed conjunctively or disjunctively, whichever makes the request more inclusive.
25. The words “any” and “all” shall be construed to mean “any and all.”

INSTRUCTIONS

1. In responding to the document requests set forth below, please furnish all responsive and non-privileged information that is available to You.

2. If production of any responsive Documents are being withheld on the ground of the attorney-client privilege, attorney work product, or any other privilege, immunity, or protection, please provide a privilege log with the following information for each such Document: (a) the name of the Document; (b) the name of the person(s) who prepared the Document; (c) the name of the person(s) to whom the Document was directed or circulated; (d) the date(s) on which the Document was prepared or transmitted; (e) the name of the person(s) now in possession of the Document; (f) a description of the subject matter of the Document; and (g) the specific nature of the privilege or protection claimed with respect to the Document.
3. The Court's interim protective order in the Order Governing Proceedings entered in this manner shall govern the disclosure of confidential information in this Action. *See* Exhibit D4 at pp. 3–4.
4. Upon entry of a final protective order in this manner that protective order shall govern the disclosure of confidential information in this Action.

DOCUMENT REQUESTS

1. Documents and Communications concerning the preparation, filing, or prosecution of any of the patent applications related to the Asserted Patent.⁵ This includes, but is not limited to:

- a. A complete copy of the prosecution history and prosecution files for the

⁵ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as prosecution history estoppel, non-infringement, invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement), and inequitable conduct. Such materials will also be relevant to defenses relating to damages, including the availability of non-infringing alternatives.

Asserted Patent;

- b. Drafts of the patent applications, drawings, and documents in the possession, custody, or control of You or any attorney or agent involved in the prosecution of the Asserted Patent, except to the extent these documents are entitled to attorney-client privilege or work product protection;
- c. Patents, patent applications, or other publications reviewed in connection with the prosecution by anyone who participated in the prosecution of the Asserted Patent;
- d. Prior Art cited or considered in connection with the prosecution of the Asserted Patent;
- e. Memoranda and Communications regarding the prosecution of the Asserted Patent; and
- f. Documents referring or relating to or evidencing any decision by You, on Your behalf, or that you are aware of regarding what documents (including without limitation patents or printed publications) to cite during prosecution of the Asserted Patent.

2. Documents and Communications concerning the preparation, filing, or prosecution of any of the patent applications related to Related Patents and Related Applications.⁶

⁶ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as prosecution history estoppel, non-infringement, invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement), and inequitable conduct. Such materials will also be relevant to defenses relating to damages, including the availability of non-infringing alternatives.

This includes, but is not limited to:

- a. A complete copy of the prosecution histories and prosecution files for any Related Patents and Related Applications;
- b. Drafts of patent applications, drawings, and documents in the possession, custody, or control of You or any attorney or agent involved in the prosecution of any Related Patents or Related Applications, except to the extent these documents are entitled to attorney-client privilege or work product protection;
- c. Patents, patent applications, or other publications reviewed in connection with the prosecution by anyone who participated in the prosecution of any Related Patents or Related Applications;
- d. Prior Art cited or considered in connection with the prosecution of any Related Patents or Related Applications;
- e. Memoranda and Communications regarding the prosecution of any Related Patents or Related Applications; and
- f. Documents referring or relating to or evidencing any decision by You, on Your behalf, or that you are aware of regarding what documents (including without limitation patents or printed publications) to cite during prosecution of any Related Patents or Related Applications.

3. Documents and Communications related to each effort by You, on Your behalf, or that you are aware of to obtain patent protection in the United States or in the countries designated in the PCT application for the Asserted Patent, for the subject matter described and/or claimed in the Asserted Patent, covering the period from August 4, 2010 through the last action

taken by or on behalf of the inventor or any assignee in connection with the prosecution of the Asserted Patent or any Related Patent or Related Application.⁷

4. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums regarding the conception of the subject matter described and/or claimed in the Asserted Patent, prior to August 4, 2010.⁸

5. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums regarding the testing, design, and development of the subject matter described and/or claimed in the Asserted Patent, prior to August 2, 2017.⁹

6. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums regarding the reduction to practice of the subject matter described and/or claimed in the Asserted Patent, prior to August 2, 2017.¹⁰

7. Statements, articles, abstracts, publications, and Product literature made by, or

⁷ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁸ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

⁹ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹⁰ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

under the direction of, any of the Named Inventors concerning the subject matter described and/or claimed in the Asserted Patent, prior to August 2, 2017.¹¹

8. Laboratory notebooks, technical memoranda, technical files, diaries, appointment calendars, and trip reports, in complete unredacted form, of the Named Inventors, or made under the direction of the Named Inventors, concerning the subject matter described and/or claimed in the Asserted Patent, prior to August 2, 2017.¹²

9. Documents sufficient to identify any Person (whether or not named as an inventor) involved in the conception, research, testing, design, development, and reduction to practice of any element of any of the inventions described and/or claimed in the Asserted Patent, and to understand their role, prior to August 2, 2017.¹³

10. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums regarding the conception of the subject matter described and/or claimed in Related Patents or Related Applications, prior to August 4, 2010.¹⁴

¹¹ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹² Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹³ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹⁴ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description,

11. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums regarding the testing, design, and development of the subject matter described and/or claimed in Related Patents or Related Applications, prior to August 2, 2017.¹⁵

12. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums regarding the reduction to practice of the subject matter described and/or claimed in Related Patents or Related Applications, prior to August 2, 2017.¹⁶

13. Statements, articles, abstracts, publications, and Product literature made by, or under the direction of, any of the Named Inventors concerning the subject matter described and/or claimed in Related Patents or Related Applications, prior to August 2, 2017.¹⁷

14. Laboratory notebooks, technical memoranda, technical files, diaries, appointment calendars, and trip reports, in complete unredacted form, of the Named Inventors, or made under the direction of the Named Inventors, concerning the subject matter described and/or claimed in Related Patents or Related Applications, prior to August 2, 2017.¹⁸

indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹⁵ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹⁶ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹⁷ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹⁸ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary

15. Documents sufficient to identify any Person (whether or not named as an inventor) involved in the conception, research, testing, design, and reduction to practice (actual or constructive), or other development of any aspect (for example, any element and/or limitation) of any of the inventions described and/or claimed in Related Patents or Related Applications, and to understand their role, prior to August 2, 2017.¹⁹

16. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums that concern or show the structure, functions, or operation of, or that constitute embodiments of, any invention disclosed or claimed in the Asserted Patent, regardless of whether such embodiment was commercialized, and regardless of whether or not it worked properly, from August 4, 2010 to August 2, 2017.²⁰

17. Documents and Communications relating to Your assignment policies with inventors applicable to the invention described and/or claimed in the Asserted Patent.²¹ This

considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

¹⁹ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses, such as improper inventorship, derivation, and inequitable conduct.

²⁰ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to defenses relating to damages, including the availability of non-infringing alternatives and failure to mark.

²¹ Such materials will be relevant to issue regarding Plaintiffs standing to bring the current suit and joinder of the proper parties. Such materials will also be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “established profitability of the product made under the patent”; “the character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific Corp. v. United States Plywood Corp.*, 318 F. Supp. 1116, 1119–20 (S.D.N.Y. 1970). Courts in the United States consider these *Georgia-Pacific* factors when determining a

includes but is not limited to:

- a. Assignment agreements with the inventors of the inventions described and/or claimed in the Asserted Patent;
- b. Cost-sharing or profit-sharing agreements with the inventors of the inventions described and/or claimed in the Asserted Patent; and
- c. Remuneration agreements with inventors of the inventions described and/or claimed in the Asserted Patent.

18. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums concerning any of the following activities with regard to the subject matter described and/or claimed in the Asserted Patent:

- a. First written description and/or drawing of such subject matter;
- b. First publication of such subject matter;
- c. First promotion of such subject matter;
- d. First advertisement of such subject matter;
- e. First offer for sale of such subject matter;
- f. First sale of such subject matter;
- g. First public disclosure of such subject matter; and
- h. First public use of such subject matter.²²

19. Documents concerning the making, using, testing, selling, or disclosure of any

reasonable royalty for patent infringement damages. *See, e.g., Lucent Technologies, Inc. v. Gateway, Inc.*, 580 F. 3d 1301, 1324–37 (Fed. Cir. 2009).

²² Such materials will be relevant to defenses, such as invalidity (including obviousness, secondary considerations regarding obviousness, and anticipation) and inequitable conduct.

embodiment described and/or claimed in the Asserted Patent, or any Product, process, equipment, or service embodying or using such invention, prior to August 4, 2010.²³

20. Documents relating to any Prior Art search performed by You, on Your behalf, or that you are aware of, relating to the Asserted Patent, including, but not limited to, any search methodology or results, prior to August 2, 2017.²⁴

21. Documents relating to any Prior Art search performed by You, on Your behalf, or that you are aware of, relating to any Related Patent or Related Application, including, but not limited to, any search methodology or results, from November 8, 2006 to August 2, 2017.²⁵

22. Communications, studies, comparisons, reports, surveys, evaluations, opinions, or memorandums regarding whether any claim in the Asserted Patent is invalid, valid, enforceable, or unenforceable (including any Prior Art or alleged Prior Art), prior to August 2, 2017.²⁶

23. Documents that concern the commercial success (a secondary consideration regarding obviousness of the Asserted Patent as considered under 35 U.S.C. § 103) of any Product, process, equipment, or service that has a nexus to any invention claimed in the Asserted Patent (i.e., the Product, process, equipment, or service is “essentially the claimed invention”²⁷),

²³ Such materials will be relevant to defenses, such as invalidity (including obviousness, secondary considerations regarding obviousness, and anticipation) and inequitable conduct.

²⁴ Such materials will be relevant to defenses, such as invalidity (including obviousness, secondary considerations regarding obviousness, and anticipation) and inequitable conduct.

²⁵ Such materials will be relevant to defenses, such as invalidity (including obviousness, secondary considerations regarding obviousness, and anticipation) and inequitable conduct.

²⁶ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement) and inequitable conduct.

²⁷ *Fox Factory, Inc. v. SRAM, LLC*, 944 F. 3d 1366, 1374 (Fed. Cir. 2019).

from August 4, 2010 to August 2, 2017.²⁸

24. Documents that concern any copying by others (a secondary consideration regarding obviousness of the Asserted Patent as considered under 35 U.S.C. § 103) of any invention claimed in the Asserted Patent, or of any Product, process, equipment, or service that embodies or uses such invention, from August 4, 2010 to August 2, 2017.²⁹

25. Documents that concern any third party's praise, criticism, acknowledgments, awards, or discussion of the significance (a secondary consideration regarding obviousness of the Asserted Patent as considered under 35 U.S.C. § 103) of any invention claimed in the Asserted Patent, or of any Product, process, equipment, or service that embodies or uses such invention, from August 4, 2010 to August 2, 2017.³⁰

26. Communications (or Documents relating thereto) between You and Plaintiff, from November 8, 2006 to the present, relating to:

- a. The Asserted Patent or any inventions disclosed therein;
- b. This Action (including, without limitation, the initiation of this Action and the actual or anticipated costs, profits, and outcome of this Action);

²⁸ Such materials will be relevant to defenses, such as invalidity (including obviousness and secondary considerations regarding obviousness). Such materials will also be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “established profitability of the product made under the patent”; “the character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific Corp. v. United States Plywood Corp.*, 318 F. Supp. 1116, 1119–20 (S.D.N.Y. 1970). Courts in the United States consider these *Georgia-Pacific* factors when determining a reasonable royalty for patent infringement damages. *See, e.g., Lucent Technologies, Inc. v. Gateway, Inc.*, 580 F. 3d 1301, 1324–37 (Fed. Cir. 2009).

²⁹ Such materials will be relevant to defenses, such as invalidity (including obviousness and secondary considerations regarding obviousness).

³⁰ Such materials will be relevant to defenses, such as invalidity (including obviousness and secondary considerations regarding obviousness).

and

- c. Any Defendant, any of Defendants' technology, or any of the Accused Products.³¹

27. Communications (or Documents relating thereto) between You and any of the Named Inventors, from November 8, 2006 to the present, relating to:

- a. The Asserted Patent or any inventions disclosed therein;
- b. This Action (including, without limitation, the initiation of this Action and the actual or anticipated costs, profits, and outcome of this Action); and
- c. Any Defendant, any of Defendants' technology, or any of the Accused Products.³²

28. Negotiations, agreements, draft agreements between You and Plaintiff, from November 8, 2006 to the present, relating to:

- a. The Asserted Patent or any inventions disclosed therein;
- b. This Action (including, the initiation of this Action and the actual or anticipated costs, profits, and outcome of this Action); or
- c. Any Defendant, any of Defendants' technology, or any of the Accused

³¹ Such materials will be relevant to quantifying any alleged damages. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

³² Such materials will be relevant to quantifying any alleged damages. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

Products.³³

29. Negotiations, agreements, draft agreements between You and any Named Inventor, from November 8, 2006 to the present, relating to:

- a. The Asserted Patent or any inventions disclosed therein;
- b. This Action (including the initiation of this Action and the actual or anticipated costs, profits, and outcome of this Action); or
- c. Any Defendant, any of Defendants' technology, or any of the Accused Products.³⁴

30. Documents and Communications concerning any statement, concern, or contention by You, any Named Inventor, counsel responsible for prosecuting the patent application and their agents, regarding the scope of any of the claims or the interpretation or construction of any term or phrase in the claims of the Asserted Patent, prior to August 2, 2017.³⁵

31. Documents concerning the alleged infringement of any of the claims of the Asserted Patent, including studies, comparisons, reports, surveys, and any evaluation, opinion, memorandum, or report, comparing any of the Accused Products or any portion, feature, and/or

³³ Such materials will be relevant to quantifying any alleged damages. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

³⁴ Such materials will be relevant to quantifying any alleged damages. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

³⁵ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement) and inequitable conduct.

aspect thereof to any limitation in any claim of the Asserted Patent, prior to.³⁶

32. Documents and Communications concerning any decision to pursue or not to pursue a claim infringement of the Asserted Patent against any Defendant, from November 8, 2006 to August 2, 2017.³⁷

33. Documents and Communications concerning any decision to pursue or not to pursue a claim infringement of any Related Patent against any Defendant, from November 8, 2006 to August 2, 2017.³⁸

34. Documents comprising or memorializing any sworn statements, including affidavits, declarations, trial and deposition testimony concerning the subject matter of the Asserted Patent, by any of the Named Inventors, counsel responsible for prosecuting the patent application and their agents.t.³⁹

35. Documents comprising or memorializing any sworn statements, including affidavits, declarations, trial and deposition testimony concerning the subject matter of any Related Patents or Related Applications, by any of the Named Inventors or any person involved in the prosecution of the Asserted Patent.⁴⁰

³⁶ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement.

³⁷ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the “commercial relationship between the licensor and licensee”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

³⁸ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the “commercial relationship between the licensor and licensee”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

³⁹ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement) and inequitable conduct.

⁴⁰ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement and invalidity (including obviousness, secondary

36. Documents and Communications, relating to or concerning the assignment, licensing, acquisition, financial interest, security interest, sale, transfer of rights (in whole or in part), or any other disposition of, or any offers to buy, sell, or license the Asserted Patent.⁴¹ This includes, but is not limited to:

- a. Agreements granting rights, assignments, licenses, covenants, royalties, settlements, agreements releasing any third party from liability for infringement, and covenants not to sue, involving or concerning the Asserted Patent;
- b. Negotiations, discussions, or other Communications relating to the Documents referenced in sub-paragraph a; and
- c. Communications (or documents relating thereto) between You and potential or actual Licensees or purchasers of the Asserted Patent.

37. Documents and Communications, relating to or concerning the assignment, licensing, acquisition, financial interest, security interest, sale, transfer of rights (in whole or in part), or any other disposition of, or any offers to buy, sell, or license Related Patents or Related Applications.⁴² This includes, but is not limited to:

considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement) and inequitable conduct.

⁴¹ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁴² Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents

- a. Agreements granting rights, assignments, licenses, covenants, royalties, settlements, agreements releasing any third party from liability for infringement, and covenants not to sue, involving or concerning Related Patents, or Related Applications;
- b. Negotiations, discussions, or other Communications relating to the Documents referenced in sub-paragraph a; and
- c. Communications (or documents relating thereto) between You and potential or actual Licensees or purchasers of Related Patents or Related Applications.

38. Documents and Communications sufficient to identify any and all entities that have acquired any right, financial interest, or security interest in the Asserted Patent.⁴³

39. Studies, comparisons, reports, surveys, evaluations, opinions, or memorandums, regarding ownership of the Asserted Patent, from November 8, 2006 to August 2, 2017.⁴⁴

comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁴³ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁴⁴ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20. Such materials will also be

40. Studies, comparisons, reports, surveys, evaluations, opinions, or memorandums, regarding any standstills involving or concerning the Asserted Patent, from November 8, 2006 to August 2, 2017.⁴⁵

41. Studies, comparisons, reports, surveys, evaluations, opinions, or memorandums, regarding sales, royalties, covenants, or licenses involving or concerning the Asserted Patent, from November 8, 2006 to August 2, 2017.⁴⁶

42. Business plans, marketing plans, marketing materials, advertising plans, advertising materials, promotional materials, and offers for sale, involving or concerning the Asserted Patent, from November 8, 2006 to August 2, 2017.⁴⁷

relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁴⁵ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁴⁶ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁴⁷ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and

43. Documents and Communications sufficient to identify any and all entities that have acquired any property right, financial interest, or security interest in Related Patents or Related Applications.⁴⁸

45. Studies, comparisons, reports, surveys, evaluations, opinions, or memorandums, regarding any standstills involving or concerning Related Patents or Related Applications, from November 8, 2006 to August 2, 2017.⁵⁰

produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁴⁸ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁴⁹ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁵⁰ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness,

46. Studies, comparisons, reports, surveys, evaluations, opinions, or memorandums, regarding sales, royalties, covenants, or licenses involving or concerning Related Patents, or Related Applications, from November 8, 2006 to August 2, 2017.⁵¹

47. Business plans, marketing plans, marketing materials, advertising plans, advertising materials, promotional materials, and offers for sale, involving or concerning Related Patents, or Related Applications, from November 8, 2006 to August 2, 2017.⁵²

48. Budgets, forecasts, revenue reports, documents concerning licensing strategy, projections, cost reports, sale reports, expense reports, margin reports, and profits and loss statements and reports concerning any Product, process, equipment, or service that You allege or believe embodies any claim of the Asserted Patent, from November 8, 2006 to present.⁵³

49. Documents concerning the relationship between You and potential or actual

secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁵¹ Such materials will be relevant to license exhaustion defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20. Such materials will also be relevant to defenses, such as non-infringement and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁵² Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁵³ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

Licensees regarding the Asserted Patent, including agreements and draft agreements with such potential Licensees, Communications with such potential Licensees, and Documents exchanged with such potential Licensees that relate to such patents.⁵⁴

50. Documents concerning the relationship between You and potential or actual Licensees regarding Related Patents or Related Applications, including agreements and draft agreements with such potential Licensees, Communications with such potential Licensees, and Documents exchanged with such potential Licensees that relate to such patents.⁵⁵

51. Documents reflecting any analyses or projections regarding the financial impact and duration thereof on You or any other assignee or Licensee due to the alleged infringement of the Asserted Patent, from November 8, 2006 to August 2, 2017.⁵⁶

52. Valuations of the Asserted Patent (either alone, or together with other patents or consideration, including as part of an intellectual property portfolio) from November 8, 2006 to

⁵⁴ Such materials will be relevant to patent exhaustion and license defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁵⁵ Such materials will be relevant to patent exhaustion and license defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁵⁶ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

August 2, 2017.⁵⁷

53. Valuations of Related Patents or Related Applications (either alone, or together with other patents or consideration, including as part of an intellectual property portfolio) from November 8, 2006 to August 2, 2017.⁵⁸

54. Documents and Communications concerning an appraisal or valuation of any license, covenant, royalty, technology transfer, or authorization-to-use agreement that relates to the Asserted Patent, including appraisals or valuations performed for tax purposes, from November 8, 2006 to August 2, 2017.⁵⁹

55. Documents and Communications concerning the right, title, or interest in any litigation or action involving any of the Asserted Patent, Related Patents, or Related Applications, including analyses or opinions related thereto, from November 8, 2006 to August 2, 2017.⁶⁰

⁵⁷ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁵⁸ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁵⁹ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁶⁰ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and

56. Documents sufficient to identify any licensing policy that You may have, including without limitation policies and practices relating to taking or granting licenses, concerning the Asserted Patent.⁶¹

57. Documents sufficient to identify any licensing policy that You may have, including without limitation, policies and practices relating to taking or granting licenses, concerning Related Patents or Related Applications.⁶²

58. Documents and Communications concerning whether You and/or Your Licensees have complied with the marking or notice provisions of 35 U.S.C. § 287(a)⁶³ with respect to the Asserted Patent, including but not limited to one copy or sample of each and every Product and/or package or other material on which the patent number of the Asserted Patent has been or

produced by the licensor” and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁶¹ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the “licensor’s established policy and marketing program to maintain his patent monopoly by not licensing others to use the invention or by granting licenses under special conditions designed to preserve that monopoly”, among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁶² Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the “licensor’s established policy and marketing program to maintain his patent monopoly by not licensing others to use the invention or by granting licenses under special conditions designed to preserve that monopoly”, among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁶³ 35 U.S.C. § 287(a) states: “Patentees, and persons making, offering for sale, or selling within the United States any patented article for or under them, or importing any patented article into the United States, may give notice to the public that the same is patented, either by fixing thereon the word “patent” or the abbreviation “pat.”, together with the number of the patent, or by fixing thereon the word “patent” or the abbreviation “pat.” together with an address of a posting on the Internet, accessible to the public without charge for accessing the address, that associates the patented article with the number of the patent, or when, from the character of the article, this can not be done, by fixing to it, or to the package wherein one or more of them is contained, a label containing a like notice. In the event of failure so to mark, no damages shall be recovered by the patentee in any action for infringement, except on proof that the infringer was notified of the infringement and continued to infringe thereafter, in which event damages may be recovered only for infringement occurring after such notice. Filing of an action for infringement shall constitute such notice.”

are marked.⁶⁴

59. Documents sufficient to identify, and to show the design, operation, or functioning of, any commercially acceptable, non-infringing (potential or actual) alternative to the subject matter claimed in the Asserted Patent, after December 16, 2014.⁶⁵

60. Documents sufficient to identify, and to show the design, operation, or functioning of any technically acceptable, non-infringing (potential or actual) alternative to the subject matter claimed in the Asserted Patent, after December 16, 2014.⁶⁶

61. Documents sufficient to identify the nature and scope of any rights you retained in the Asserted Patent, including any right to control litigation, future royalties, payments for licenses of the Asserted Patent, or payments relating to or resulting from the outcome of any litigation involving or relating to the Asserted Patent (including without limitation the Action).⁶⁷

62. Documents and Communications exchanged with trade associations, standards setting organizations, or industry working groups, relating to the subject matter of the Asserted Patent, or the inventions disclosed therein, from November 8, 2006 to the present.⁶⁸ This includes

⁶⁴ Such materials will be relevant to defenses relating to damages, including failure to mark.

⁶⁵ Such materials will be relevant to defenses relating to damages, including the availability of non-infringing alternatives.

⁶⁶ Such materials will be relevant to defenses relating to damages, including the availability of non-infringing alternatives.

⁶⁷ Such materials will be relevant to issue regarding Plaintiffs standing to bring the current suit and joinder of the proper parties. Such materials will be relevant to patent exhaustion and license defenses, as well as, to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁶⁸ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary

but is not limited to:

- a. Communications with trade associations, standards setting organizations, or industry trade groups relating to the Asserted Patent, or the inventions disclosed therein;
- b. Technical and non-technical submissions to trade associations, standards setting organizations, or industry trade groups relating to the Asserted Patent, or the inventions disclosed therein;
- c. Intellectual property declarations to any trade associations, standards setting organizations, or industry trade groups relating to the Asserted Patent, or the inventions disclosed therein; and
- d. Documents related to trade associations, standards setting organizations, or industry trade groups meetings (including working group meetings) where the subject matter described and/or claimed in the Asserted Patent was discussed.

63. Documents and Communications exchanged with trade associations, standards setting organizations, or industry working groups, relating to the subject matter of Related Patents, Related Applications, from November 8, 2006 to the present.⁶⁹ This includes but is not limited to:

- a. Communications with trade associations, standards setting organizations,

considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

⁶⁹ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement).

or industry trade groups relating to Related Patents, Related Applications, or the inventions disclosed therein;

- b. Technical and non-technical submissions to trade associations, standards setting organizations, or industry trade groups relating to Related Patents, Related Applications, or the inventions disclosed therein;
- c. Intellectual property declarations to any trade associations, standards setting organizations, or industry trade groups relating to Related Patents, Related Applications, or the inventions disclosed therein; and
- d. Documents related to trade associations, standards setting organizations, or industry trade groups meetings (including working group meetings) where the subject matter described and/or claimed in Related Patents was discussed.

64. Documents (including without limitation correspondence, notes, meeting minutes, proposals, statements, and other Communications) regarding what constitutes Fair Reasonable and Non-Discriminatory (“FRAND”) or Reasonable and Non-Discriminatory (“RAND”) terms relating to patent licensing in the technical space related to the subject matter of the Asserted Claims.⁷⁰

⁷⁰ Such materials will be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; “portion of the profit or of the selling price that may be customary in the particular business or in comparable businesses to allow for the use of the invention or analogous inventions”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

65. Documents concerning all sections and/or subsection of any standard or draft standard to which You believe the Asserted Patent are essential.⁷¹

66. Documents concerning all sections and/or subsection of any standard or draft standard to which You believe the Asserted Patent is relevant to.⁷²

67. Agreements that You have concerning patents declared essential to or any standard related to the subject matter of the Asserted Patent, such as standards maintained by the Institute of Electrical and Electronics Engineers, Internet Engineering Task Force, and the European Telecommunications Standards Institute.⁷³

⁷¹ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁷² Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁷³ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the

68. Agreements that You have concerning patents that You contend are relevant to standards related to the subject matter of the Asserted Patent, such as standards maintained by the Institute of Electrical and Electronics Engineers, Internet Engineering Task Force, and the European Telecommunications Standards Institute.⁷⁴

69. Documents sufficient to identify patents of which You are aware that have been contented to be essential to, or relevant to, standards or draft standard for which the Asserted Patent has been contented to be essential to, or relevant to, such as standards maintained by the Institute of Electrical and Electronics Engineers, Internet Engineering Task Force, and the European Telecommunications Standards Institute.⁷⁵

70. Documents sufficient to show Your past and present electronic data and Document destruction and retention policies with respect to the Documents produced in response to the

licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁷⁴ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

⁷⁵ Such materials will be relevant to determining the scope of the patents in claim construction and to defenses, such as non-infringement, and invalidity (including obviousness, secondary considerations regarding obviousness, anticipation, patent-eligibility, written description, indefiniteness, and enablement). Such materials will also be relevant to quantifying any alleged damages pursuant the *Georgia-Pacific* factors, which require consideration of the: “royalties received by the patentee”; “rates paid by the licensee for the use of other patents comparable to the patent in suit”; “established profitability of the product made under the patent”; “character of the commercial embodiment of it as owned and produced by the licensor”; and “portion of the realizable profit that should be credited to the invention”; among others things. *Georgia-Pacific*, 318 F. Supp. at 1119–20.

above requests.

EXHIBIT D2

ORAL EXAMINATION TOPICS REQUESTED

Defendants Dell Technologies Inc., Dell Inc., and EMC Corporation (collectively, “Defendants”) seek to ask questions on topics described below.

DEFINITIONS

The following definitions are applicable to terms employed in responding to this request:

1. “Accused Product” or “Accused Products” shall refer to any device, product, or other thing that Plaintiff is permitted to accuse of infringing the Asserted Patent in this Action. A copy of the Complaint in case number 6:20-cv-00477-ADA is attached as Exhibit D3. In referring to any device, product, or other thing as an “Accused Product,” Defendants in no way communicate their agreement that it infringes the Asserted Patent.
2. “Action” shall refer to the above-captioned proceeding in the United States District Court for the Western District of Texas, with case number 6:20-cv-00477-ADA.
3. “Asserted Claim” shall refer to each claim of the Asserted Patent that Plaintiff contends Defendants infringe.
4. “Asserted Patent” shall refer to U.S. Patent No. 8,913,489 and any patent applications related thereto.
5. “Communication” shall mean, without limitation, any written, oral, or other transmission of information, including but not limited to emails.
6. “Complaint” shall refer to the Complaint (including exhibits) that Plaintiff filed on June 2, 2020 as docket number 1 in this Action, as may be amended.
7. “Concerning,” “refer(s) to,” “related to,” “reflecting,” and “relating to” shall mean directly or indirectly relating to, referring to, mentioning, reflecting, pertaining to, evidencing, illustrating, involving, describing, discussing, commenting on, embodying, responding to,

supporting, contradicting, or constituting (in whole or in part), as the context makes appropriate.

8. “Defendants” or “Defendant” shall refer to Dell Technologies Inc., Dell Inc., and EMC Corporation, and any and all of their then-current or prior subsidiaries, parents, affiliates, divisions, successors, predecessors, agents, employees, representatives, directors, officers, trustees, and attorneys, or any other person or entity acting in whole or in part in concert with any of the foregoing, directly or indirectly.
9. “Document” shall include, without limitation, all documents, electronically stored information, and tangible things within the scope of the Federal Rules of Civil Procedure, including Rule 34. Federal Rules of Civil Procedure 34 permits discovery of: “(A) documents or electronically stored information—including writings, drawings, graphs, charts, photographs, sound recordings, images, and other data or data compilations—stored in any medium from which information can be obtained either directly or, if necessary, after translation by the responding party into a reasonably usable form; or (B) any designated tangible things.”
10. “Employee” shall refer to any officer, director, partner, employee, representative, or agent.
11. “Licensee(s)” shall refer to any entity having a license, assignment, covenant not to sue, or other understanding, written, oral or implied, that the entity has any rights to the Asserted Patent, any Related Patents, or any Related Applications, may practice one or more claims of the Asserted Patent and/or that Plaintiff will not file suit or otherwise enforce against that entity one or more claims of the Asserted Patent or any Related Patent or Related Application.

12. “Named Inventor” shall refer to any individual who is listed as an inventor on the Asserted Patent or any Related Patent or Related Application thereof.
13. “Person” shall refer to any natural person, firm, association, partnership, government agency, corporation, proprietorship, or other entity and its officers, directors, partners, employee, representatives, and agents.
14. The terms “Plaintiff,” and/or “WSOU” shall refer to the responding Plaintiff WSOU Investments, LLC d/b/a Brazos Licensing and Development, and any and all of its then-current or prior subsidiaries, parents, affiliates, divisions, successors, predecessors, agents, employees, representatives, directors, officers, trustees, and attorneys, or any other person or entity acting in whole or in part in concert with any of the foregoing, directly or indirectly.
15. “Prior Art” encompasses, without limitation, the subject matter described in each and every subdivision of 35 U.S.C. §§ 102 and 103, and includes, but is not limited to, memoranda, notes, manuals, interviews, testing data, disclosures, prototypes, correspondence, drawings, papers, articles, patents, printed publications, public uses, demonstrations, offers for sale or license, and sales.
16. “Related Application(s)” means any and all applications related to the Asserted Patent, including any provisional or non-provisional applications, continuations, continuations-in-part, divisions, interferences, reexaminations, re-issues, parents, foreign counterpart applications, and any other applications disclosing, describing or claiming any invention disclosed, described or claimed in the Asserted Patent, or claiming the benefit of the filing date of any application whose benefit is claimed in the Asserted Patent, whether or not abandoned and whether or not issued.

17. “Related Patent(s)” means any and all U.S. or foreign patents based upon or related to any Related Application(s) or Asserted Patent, including any patents or applications that may have been opposed, reexamined, re-issued or subjected to any validity or nullity proceeding.
18. “Third Party” shall refer to any person other than Plaintiff or Defendants.
19. “You,” “Your,” “Yours” shall refer to each Authorized Representative of Nokia Solutions & Networks B.V., and any and all of its then-current or prior subsidiaries, parents, affiliates, divisions, successors, predecessors, agents, employees, representatives, directors, officers, trustees, and attorneys, or any other person or entity acting in whole or in part in concert with any of the foregoing, directly or indirectly.
20. “Product(s)” means a machine, manufacture, apparatus, device, instrument, mechanism, appliance, software, service, process, or an assemblage of components/parts (either individually or collectively) that are designed to function together electronically, mechanically, or otherwise, including any offered for sale or under development.
21. Any pronouns shall be construed to refer to the masculine, feminine, or neutral gender, in singular or plural, as in each case is most appropriate.
22. The singular form of any word shall be construed to also include the plural, and vice-versa.
23. The word “each” shall be construed to mean “each and every.”
24. The words “and” and “or” shall be construed conjunctively or disjunctively, whichever makes the request more inclusive.
25. The words “any” and “all” shall be construed to mean “any and all.”

INSTRUCTIONS

1. This request seeks disclosure to the full extent of the Federal Rules of Civil Procedure and shall be interpreted as inclusive rather than exclusive.

2. It is Your duty in responding to this request to designate one or more officers, directors, managing agents, or other Persons who are the most knowledgeable with respect to the topics identified below.

DEPOSITION TOPICS

1. The alleged invention(s) claimed in each Asserted Claim, and the alleged benefits, advantages, disadvantages or limitations of those alleged invention(s) as compared to the state of the art at the time of filing, and the factual bases thereof.

2. The inventorship of each Asserted Claim, including identification of any individuals other than the Named Inventors who aided or participated in the conception, reduction to practice, or diligence toward reduction to practice of the subject matter of the Asserted Claims.

3. The role of each Named Inventor, as well as any individual identified pursuant to Topic No. 2, in the alleged invention of each Asserted Claim, including conception, diligence and reduction to practice, and including the subject matter to which each Person contributed, and the dates and circumstances in which each Named Inventor, as well as any individual identified pursuant to Topic No. 2, made such contributions.

4. The conception, reduction to practice, and diligence toward the reduction to practice of each Asserted Claim, and any corroboration thereof.

5. The dates and circumstances concerning any first disclosure, demonstration, sale or offer for sale of any prototype or commercial embodiment of any of the inventions claimed in the Asserted Claims, and the identification and subject matter of any documents relating to or referring to each such activity.

6. The past and current ownership of the Asserted Patent, including its chain of title.

7. The preparation and prosecution of the applications relating to the Asserted Patent, any Related Patents, Related Applications, and patents and applications incorporated by reference into the Asserted Patent, and any certificates of correction.

8. The state of the art at the time of filing for the Asserted Patent, any Related Patents, Related Applications, and patents and applications incorporated by reference into the Asserted Patent, and Your knowledge thereof.

9. Any facts, studies, investigations, information, documents (including Prior Art), and analyses You identified, received, or knew at any time relating to the alleged validity, enforceability, infringement, valuation, or priority dates of the Asserted Patent, Related Patents, Related Applications, or patents and applications incorporated by reference into the Asserted Patent, including any Communications with third parties relating to the foregoing.

10. Any facts, studies, investigations, information, documents, and analyses regarding the structure, functions, development of, or operation of, or that constitute embodiments of, any alleged invention disclosed or claimed in the Asserted Patent, regardless of whether such embodiment was commercialized, and regardless of whether or not it worked properly.

11. Any attempts to sell or otherwise transfer financial interests in the Asserted Patent, any portfolio of patents containing the Asserted Patent, or any patents related to the subject matter of the Asserted Claims.

12. The timing and circumstances related to Your first knowledge or awareness of any alleged infringement of the Asserted Patent by each of the Defendants.

13. Any decision to pursue or not to pursue a claim infringement of any of the claims of the Asserted Patent against any Defendant.

14. Any efforts by You, any predecessor-in-interest of the Asserted Patent, or any other Person to enforce or license the Asserted Patent, or any portfolio of patents containing the Asserted Patent, or any patents related to the subject matter of the Asserted Claims.

15. Your policies and practices concerning patent agreements (including licensing), including:

- a. any written licensing policies or best practices;
- b. any most favored Licensee;
- c. the economic and technical factors considered by You in drafting and entering into any license, royalties, standstill or settlement agreements;
- d. any standard or preferred terms for license, royalty, standstill or settlement agreements;
- e. the process by which You determine the nature, scope and terms of license agreements in which You are a licensor; and
- f. any circumstance in which You deviated from such policies.

16. Your knowledge of, and participation in, any Communications between Plaintiff and Defendants prior to the filing of the Action.

17. Any Communications related to Plaintiff, including communications related to licensing of any patents related the subject matter of the Asserted Claims, including the Asserted Patent, Related Patents, and Related Applications, compensation, license rates, royalties related thereto, agreements with Plaintiff, Defendants, the Action, the decision to file the Action, requests or offers to provide assistance, witnesses and/or documents for use in the Lawsuit, and any discussion about standing of Plaintiff to bring the Action.

18. Your relationship with all potential Licensees, including all agreements,

assurances, covenants not to sue, and understandings not to assert patents against such potential Licensees, including but not limited to Communications and agreements relating to the Asserted Patent, Related Patents or Related Applications, and the circumstances relating to such activity.

19. Your relationship with any entity associated with Stuart A. Shanus, Marc Wade, and/or Craig Etchegoyen, including without limitation Wade and Company, Orange Holdings, WSOU, and/or Uniloc USA, Inc.,¹ including any patent license agreements with any such entity that relate to patents or patent applications that claim subject matter related to the subject matter of the Asserted Claims.

20. Any Communication You engaged in regarding each Defendant and its respective products or services, and any analysis You performed of each Defendant and its respective products and services related to the Asserted Patent, Related Patents or Related Applications.

21. Any valuations of the Asserted Patent or any portfolio of patents that includes the Asserted Patent.

22. Any licenses, assignments, conveyances, security interests, or other agreements relating to the Asserted Patent, or any portfolio of patents that includes or included the Asserted Patent, and negotiations leading to and circumstances surrounding such agreement.

23. Any revenues and profits received by You for any products practicing the alleged invention of the Asserted Patent.

24. Revenues, costs, expenses, and profits (including gross and net profits) generated in connection with Your ownership of, the Asserted Patent, and the methodology used to calculate or otherwise determine revenues, costs, expenses, and/or profits.

¹ Stuart A. Shanus and Craig Etchegoyen are the Chairman and President of WSOU. Mark Wade, Wade and Company, Orange Holdings, and/or Uniloc USA, Inc. are all related persons or entities of WSOU.

25. Any licensing fees and rates paid to You for each portfolio that includes the Asserted Patent.

26. The rates paid by any Licensee to You for the use of other patents comparable to the Asserted Patent.

27. Any financial interests that You may have in the Asserted Patent, including but not limited to royalties and the outcome of the Action.

28. Any facts, studies, investigations, and analyses relating to any submission of intellectual property right declarations with respect to the Asserted Patent to any standard maintained by an international and/or domestic trade association or standards setting organization, including all analyses or opinions related thereto.

29. Any facts, studies, investigations, and analyses relating to any alleged essentiality of the Asserted Patent to any industry standard, including any Communications with third parties relating to the foregoing.

30. Any investigation of the standards activity and intellectual property right disclosures of any predecessor-in-interest to the Asserted Patent, including any investigation by You into the intellectual property right policies, Fair Reasonable and Non-Discriminatory (“FRAND”) obligations, or Reasonable and Non-Discriminatory (“RAND”) terms relating to patent licensing in the technical space related to the subject matter of the Asserted Claims.

31. The role of You and/or any prior owner of the Asserted Patent, or any affiliates of You, or a prior owner of the Asserted Patent, in any standards setting organization from August 4, 2010 to present.

32. Any Communications that You, any predecessor-in-interest of the Asserted Patent, and/or any Named Inventors had with an international and/or domestic trade association

or standards setting organizations regarding the subject matter of the Asserted Claims.

33. Any disclosures made by or on behalf of You or any predecessor-in-interest of the Asserted Patent to an international and/or domestic trade association or standards setting organization regarding the existence and/or potential standard essentiality of the Asserted Patent, Related Patents, or Related Applications.

34. Your knowledge of, and compliance with, intellectual property right policies of an international and/or domestic trade association or standards setting organization related to the subject matter of the Asserted Claims.

35. Your knowledge of, and compliance with, FRAND and/or RAND obligations, including without limitation any policies, guidelines, or instructions, and any related analysis or discussions.

36. Your collection, retention and production of documents and information relevant to the Action, including but not limited to:

- a. Your production of documents and information to Defendants, either directly or indirectly through Plaintiff;
- b. Your efforts to identify, locate and gather documents for production, including identification of custodians;
- c. the storage types and physical location of relevant data;
- d. a description of all sources containing the information which has been produced by You, including custodians thereof; and
- e. all databases and email systems containing information or documents relevant to the Action and produced, referenced, created or used through the present, and operation of such systems or databases, including ability to

search, storage, retrieving, backup, archiving, cataloguing, and the identity of Persons responsible for administering those databases and/or email systems.

37. The subject matter and content of all Documents and Communications identified and/or produced in response to the above requests.

38. The authenticity of all Documents identified in response to the requests for production.

39. All Documents reviewed by You in connection with the deposition on these topics.

40. For each of the topics set forth in this request, the identity and location of Your employee, agent, representative, independent contractor, or other partner, affiliate, or business associate, with the most knowledge concerning that topic.

EXHIBIT D3

4. On information and belief, defendant Dell Inc. is a Delaware corporation with a principal place of business at One Dell Way, Round Rock, Texas 78682. Dell Inc. is wholly owned by its corporate parent, Dell Technologies Inc.

5. On information and belief, defendant EMC Corporation is a Massachusetts corporation with a principal place of business at One Dell Way, Round Rock, Texas 78682. EMC Corporation is wholly owned by its corporate parent, Dell Technologies Inc.

JURISDICTION AND VENUE

6. This is an action for patent infringement which arises under the Patent Laws of the United States, in particular, 35 U.S.C. §§ 271, 281, 284, and 285.

7. This Court has jurisdiction over the subject matter of this action under 28 U.S.C. §§ 1331 and 1338(a).

8. This Court has specific and general personal jurisdiction over each defendant pursuant to due process and/or the Texas Long Arm Statute, because each defendant has committed acts giving rise to this action within Texas and within this judicial district. The Court's exercise of jurisdiction over each defendant would not offend traditional notions of fair play and substantial justice because each defendant has established minimum contacts with the forum. For example, on information and belief, each defendant has committed acts of infringement in this judicial district, by among other things, selling and offering for sale products that infringe the asserted patent, directly or through intermediaries, as alleged herein.

9. Venue in the Western District of Texas is proper pursuant to 28 U.S.C. §§1391 and/or 1400(b). Each defendant has established places of business in the Western District of Texas. Each defendant is registered to do business in Texas. Upon information and belief, each defendant has transacted business in this District and has committed acts of infringement in this District.

COUNT ONE - INFRINGEMENT OF
U.S. PATENT NO. 8,913,489

10. Brazos re-alleges and incorporates by reference the preceding paragraphs of this Complaint.

11. On December 16, 2014, the United States Patent and Trademark Office duly and legally issued U.S. Patent No. 8,913,489 (“the ‘489 Patent”), entitled “System and Method for Virtual Fabric Link Failure Recovery.” A true and correct copy of the ‘489 Patent is attached as Exhibit A to this Complaint.

12. Brazos is the owner of all rights, title, and interest in and to the ‘489 Patent, including the right to assert all causes of action arising under the ‘489 Patent and the right to any remedies for the infringement of the ‘489 Patent.

13. Defendants make, use, sell, offer for sale, import, and/or distribute in the United States, including within this judicial district, products such as, but not limited to, networking

switches with Virtual Link Trunking (VLT), including but not limited to, C9000 series switches (collectively, the “Accused Products”).

14. The Accused Products provide multi-rate, modular switching platforms, which can be used for campus, mid-market, and large-enterprise networks and support Layer 2 multipath using VLT.

Dell Networking C9000 Series Switches

...

Next-generation modular chassis switch

<https://www.dell.com/en-us/work/shop/povw/networking-c9000-series>

15. The Accused Products operate based on Dell Networking OS (DNOS), which incorporates features from Force10 Networks’s Force10 Operating System (FTOS), including VLT. VLT allows two physical switches to be represented as a single logical switch, which can be regarded as a part of a multi-chassis link aggregation group (MC-LAG). With physical links as a

port-channel, connecting two individual switches configured with VLT would logically group it as a single entity only for the access switches which connect to the VLT domain.

Virtual Link Trunking (VLT)

Virtual link trunking (VLT) is supported on Dell Networking OS.

Overview

VLT reduces the role of spanning tree protocols (STPs) by allowing link aggregation group (LAG) terminations on two separate distribution or core switches and supporting a loop-free topology.

To prevent the initial loop that may occur prior to VLT being established, use a spanning tree protocol. After VLT is established, you may use rapid spanning tree protocol (RSTP) to prevent loops from forming with new links that are incorrectly connected and outside the VLT domain.

VLT provides Layer 2 multipathing, creating redundancy through increased bandwidth, enabling multiple parallel paths between nodes and load-balancing traffic where alternative paths exist.

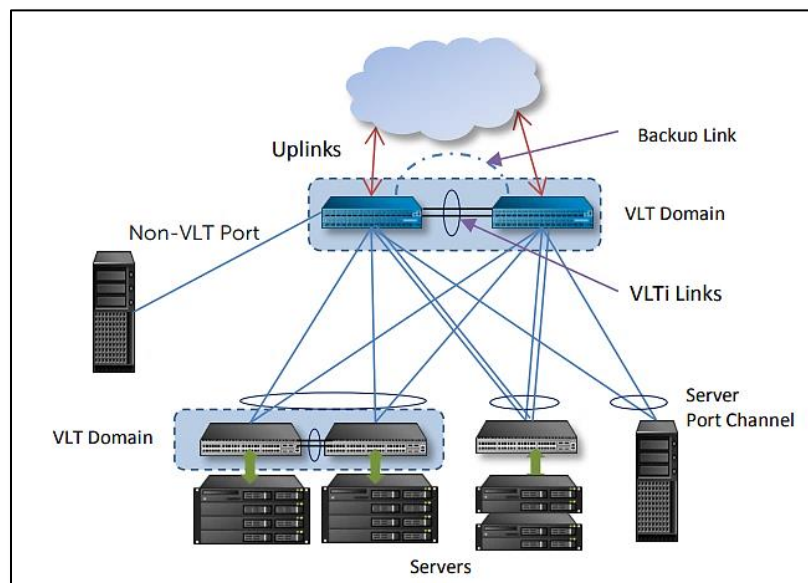

Virtual link trunking offers the following benefits:

- Allows a single device to use a LAG across two upstream devices.
- Eliminates STP-blocked ports.
- Provides a loop-free topology.
- Uses all available uplink bandwidth.
- Provides fast convergence if either the link or a device fails.
- Optimized forwarding with virtual router redundancy protocol (VRRP).
- Provides link-level resiliency.

https://topics-cdn.dell.com/pdf/networking-c9000-series_users-guide_en-us.pdf

16. For example, a VLT topology may include two switches, including an Accused Product, in a VLT Domain that communicates with servers by forming a multi-chassis link aggregation group over port interfaces of the switches.

1.6 Typical VLT Topology

https://downloads.dell.com/solutions/networking-solution-resources/Virtual%20Link%20Trunking-Reference%20Architecture%20%200_External.pdf

17. Further, as shown in the example above, switches in the VLT Domain may be considered VTI peer devices and connected using a VLTi interconnect port-channel, which acts a virtual fiber link. The VLT interconnect (VLTi) carries MAC, ARP Tables, and IGMP State information between the VLT peer switches in a VLT topology.

VLT Terminology

...

- **VLT interconnect (VLTi)** – The link used to synchronize states between the VLT peer switches. Both ends must be on 10G or 40G interfaces.

...

- **VLT peer device** – One of a pair of devices that are connected with the special port channel known as the VLT interconnect (VLTi).

VLT peer switches have independent management planes. A VLT interconnect between the VLT chassis maintains synchronization of L2/L3 control planes across the two VLT peer switches. The VLT interconnect uses either 10G or 40G user ports on the chassis.

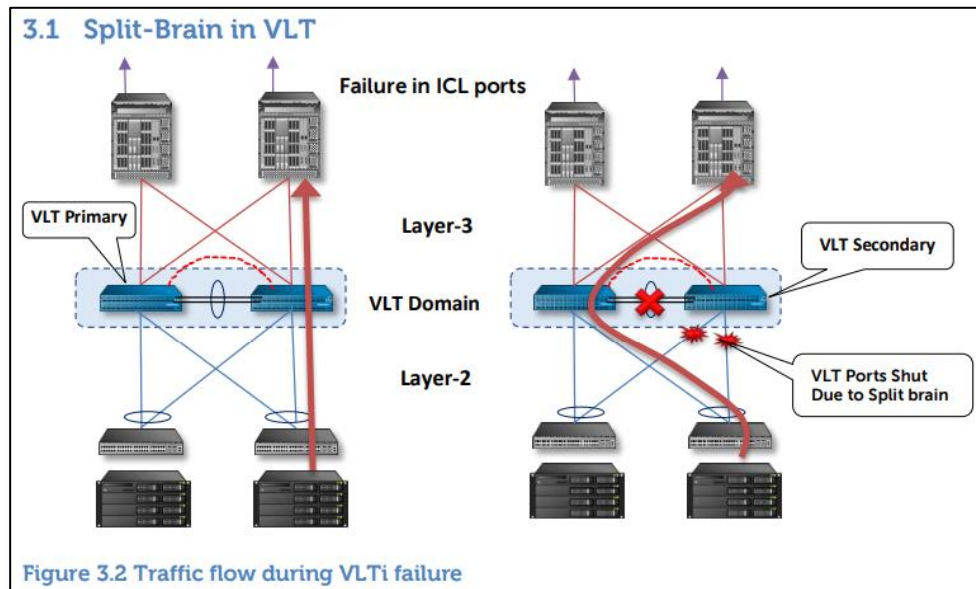

https://topics-cdn.dell.com/pdf/networking-c9000-series_users-guide_en-us.pdf

1.2 VLT Implementation

Periodic hello messages are sent through the VLT Interconnect (VLTi) and the VLT control messages are sent in TLV format through the VLTi links for synchronizing the L2/L3 control planes across the two VLT peers. MAC, ARP tables, IGMP States are synchronized between the VLT peers ensuring traffic flow across the links and seamless failover in case of VLT link or node failure. The VLT feature ensures the local traffic on a VLT Switch takes the shortest path to the destination through the VLT links and not through the VLTi links. However VLTi carries the traffic during the link failure states. (Figure 1.0)

https://downloads.dell.com/solutions/networking-solution-resources/Virtual%20Link%20Trunking-Reference%20Architecture%20%200_External.pdf

18. The Accused Products can determine a connection failure of the VLTi interconnect.

https://downloads.dell.com/solutions/networking-solution-resources/Virtual%20Link%20Trunking-Reference%20Architecture%20%200_External.pdf

Configuration Notes

...

- Failure scenarios

...

- If all ports in the VLT interconnect fail, or if the messaging infrastructure fails to communicate across the interconnect trunk, the VLT management system uses the backup link interface to determine whether the failure is a link-level failure or whether the remote peer has failed entirely. If the remote peer is still alive (heartbeat messages are still being received), the VLT secondary switch disables its VLT port channels. If keepalive messages from the peer are not being received, the peer continues to forward traffic, assuming that it is the last device available in the network. In either case, after recovery of the peer link or reestablishment of message forwarding across the interconnect trunk, the two VLT peers resynchronize any MAC addresses learned while communication was interrupted and the VLT system continues normal data forwarding.

https://topics-cdn.dell.com/pdf/networking-c9000-series_users-guide_en-us.pdf

19. When the MC-LAG is disrupted (e.g., after the Accused Products determines VLTi and back uplink failure between VLT peer switches), the MC-LAG can be reconfigured into two link aggregates associated with each VLT peer switch to take the primary role and continue to communicate traffic over link aggregates to the end node. In the Accused Products, the VLT backup link can be configurable. If a VLT backup link is not enabled, then during VLTi failure, both VLT peer switches may take primary roles to form link aggregates.

3.1 Split-Brain in VLT

...

In case of both VLTi and backup link failure, both the VLT nodes take primary role and continue to pass the traffic if the system mac is configured on both the VLT peers. However there would not be MAC/ARP synchronization.

https://downloads.dell.com/solutions/networking-solution-resources/Virtual%20Link%20Trunking-Reference%20Architecture%202%200_External.pdf

Configuring a VLT Backup Link

To configure a VLT backup link, use the following command.

1. Specify the management interface to be used for the backup link through an out-of-band management network.

CONFIGURATION mode

```
interface managementethernet slot/ port
```

https://topics-cdn.dell.com/pdf/networking-c9000-series_users-guide_en-us.pdf

20. In the event of VLTi failure causing disruption of the MC-LAG, the spanning tree protocol (STP) may be initiated in the first set of port interfaces to avoid a traffic loop.

5.1 Dell#1 Switch Configurations and Verification

Dell#1#sh run | find protocol

```
protocol spanning-tree pvst
```

```
no disable
```

```
vlan 1,20,800,900 bridge-priority 0
```

(Take note that deploying VLT does NOT preclude the need to deploy the spanning tree protocol (STP). STP will be acting as a loop prevention mechanism in the event of a VLT failure or an errant connection that creates a physical bridging loop.

!

<https://www.dell.com/community/s/vjauj58549/attachments/vjauj58549/Network/35449/1/Route%20VLT%20v1.2.pdf>

21. In view of preceding paragraphs, each and every element of at least claim 8 of the '489 Patent is found in the Accused Products. And upon information and belief, each and every element of at least claim 8 of the '489 Patent is performed or practiced by Defendants at least through Defendants' own use and configuration of its own Accused Products, and/or through Defendants' own testing and configuration of its own Accused Products, and/or through

Defendants' providing services for its Accused Products, including but not limited to providing installation, deployment, support, and configuration of its Accused Products.

22. Defendants continue to directly infringe at least one claim of the '489 Patent, literally or under the doctrine of equivalents, by making, using, selling, offering for sale, importing, and/or distributing the Accused Products in the United States, including within this judicial district, without the authority of Brazos.

23. In May 2020, Plaintiff filed a suit against Defendants asserting infringement of the same patent and by the same accused products that are asserted in this case. Plaintiff dismissed the prior suit before filing this suit. As a result of the prior suit, Defendants had notice and actual or constructive knowledge of their infringement of the patent-in-suit since at least May 2020, before the filing of this case. Further, Defendants had knowledge of their infringement of the patent-in-suit before the filing of this Amended Complaint.¹

24. Since at least May 2020, through its actions, Defendants have actively induced product makers, distributors, retailers, and/or end users of the Accused Products to infringe the

¹ Dell filed a motion to dismiss that is mooted by this amended complaint. Dell's motion cites a WDTX case (which relies authority from the District of Delaware) for the proposition that knowledge of a plaintiff's patent after the lawsuit was filed is insufficient to plead the requisite knowledge for indirect infringement. *See Aguirre v. Powerchute Sports, LLC*, No. SA-10-CV-0702 XR, 2011 WL 2471299, at *3 (W.D. Tex. June 17, 2011) (citing *Xpoint Techs. v. Microsoft Corp.*, 730 F.Supp.2d 349 (D. Del. 2010)). Several Delaware courts have since rejected this rule because there is no statutory basis to support it and because there is no purpose served by the formality of requiring the plaintiff to file an amended complaint in order to be allowed to assert knowledge of the patents during the period following the filing of the original complaint. *See Walker Digital, LLC v. Facebook, Inc.*, 852 F. Supp. 2d 559, 566 (D. Del. 2012) ("The court acknowledges that this result is inconsistent with its prior decisions in *Xpoint Techs. v. Microsoft Corp.*, 730 F.Supp.2d 349 (D.Del.2010), and *EON Corp. IP Holdings LLC v. FLO TV Inc.*, 802 F.Supp.2d 527 (D. Del. 2011). Given the ease of amendment, the limitation of damages to post-knowledge conduct, and in the interests of judicial economy, the court finds that the better reasoning is to allow a complaint that satisfies Rule 8 to proceed to discovery rather than dismissing it for lack of pre-filing knowledge when, by the time the motion to dismiss has been filed, defendant in fact has the requisite knowledge as pled by plaintiff."); *see also IOENGINE*,

‘489 Patent throughout the United States, including within this judicial district, by, among other things, advertising and promoting the use of the Accused Products in various websites, including providing and disseminating product descriptions, operating manuals, and other instructions on how to implement and configure the Accused Products. Examples of such advertising, promoting, and/or instructing include the documents at:

- <https://www.dell.com/en-us/work/shop/povw/networking-c9000-series>
- <https://www.dell.com/en-us/work/shop/productdetailstxn/force10-ftos>
- https://topics-cdn.dell.com/pdf/networking-c9000-series_users-guide_en-us.pdf
- https://downloads.dell.com/solutions/networking-solution-resources/Virtual%20Link%20Trunking-Reference%20Architecture%202%200_External.pdf
- <https://www.dell.com/community/s/vjauj58549/attachments/vjauj58549/Network/35449/1/Routed%20VLT%20v1.2.pdf>

25. Since at least May 2020, through its actions, Defendants have contributed to the infringement of the ‘489 Patent by having others sell, offer for sale, or use the Accused Products throughout the United States, including within this judicial district, with knowledge that the Accused Products infringe the ‘489 Patent. The Accused Products are especially made or adapted for infringing the ‘489 Patent and have no substantial non-infringing use. For example, in view of the preceding paragraphs, the Accused Products contain functionality which is material to at least one claim of the ‘489 Patent.

JURY DEMAND

LLC v. PayPal Holdings, Inc., CV 18-452-WCB, 2019 WL 330515, at *4 (D. Del. Jan. 25, 2019) (“The Court sees no purpose that would be served by the formality of requiring IOENGINE to file an amended complaint in order to be allowed to assert knowledge of the patents during the period following the filing of the original complaint.”).

Brazos hereby demands a jury on all issues so triable.

REQUEST FOR RELIEF

WHEREFORE, Brazos respectfully requests that the Court:

(A) Enter judgment that Defendants infringe one or more claims of the '489 Patent literally and/or under the doctrine of equivalents;

(B) Enter judgment that Defendants have induced infringement and continue to induce infringement of one or more claims of the '489 Patent;

(C) Enter judgment that Defendants have contributed to and continue to contribute to the infringement of one or more claims of the '489 Patent;

(D) Award Brazos damages, to be paid by Defendants in an amount adequate to compensate Brazos for such damages, together with pre-judgment and post-judgment interest for the infringement by Defendants of the '489 Patent through the date such judgment is entered in accordance with 35 U.S.C. § 284, and increase such award by up to three times the amount found or assessed in accordance with 35 U.S.C. § 284;

(E) Declare this case exceptional pursuant to 35 U.S.C. § 285; and

(F) Award Brazos its costs, disbursements, attorneys' fees, and such further and additional relief as is deemed appropriate by this Court.

Dated: October 19, 2020

Respectfully submitted,

/s/ James L. Etheridge

COUNSEL FOR PLAINTIFF

EXHIBIT D4

UNITED STATES DISTRICT COURT
Western District of Texas
WACO DIVISION

WSOU INVESTMENTS LLC §
vs. § NO: WA:20-CV-00477-ADA
DELL TECHNOLOGIES INC., DELL INC., §
EMC CORPORATION §

ORDER GOVERNING PROCEEDINGS – PATENT CASE

This Order shall govern proceedings in this case. The following deadlines are hereby set:

This case is SET for a telephonic Rule 16 Case Management Conference on Wednesday, October 21, 2020 at 1:30 p.m. Participants shall dial into the following number 5 minutes before the scheduled time: **866.434.5269; access code 967-8090.** Lead counsel for each party, and all unrepresented parties, shall be present. Client representatives are welcome to attend, but such attendance is not required. In person attendance is permitted, but not required. Anyone planning to attend in person should so inform the Court by contacting chambers not later than two court days before the scheduled hearing so the Court can evaluate whether to hold the conference in the courtroom, or in chambers. The Court expects the parties to be prepared to discuss:

- a. an overview of the claims and defenses, including any unique issues the parties believe should be addressed at this stage of the case;
 - b. issues involving the case schedule and potential amendments to the Court’s default scheduling order, including the date for the *Markman* Hearing;
 - c. issues relating to claim construction, including whether a live tutorial would be of benefit to the Court;
 - d. issues relating to discovery, including potential amendments to the Court’s default discovery limits or Protective Order; and,
 - e. any other issues the parties believe would lead to the just, speedy and inexpensive determination of this action.
2. (Not later than 7 days before the CMC). Plaintiff shall serve preliminary infringement contentions in the form of a chart setting forth where in the accused product(s) each element of the asserted claims(s) are found. Plaintiff shall also identify the priority date (*i.c.*

the earliest date of invention) for each asserted claim and produce: (1) all documents evidencing conception and reduction to practice for each claimed invention, and (2) a copy of the file history for each patent in suit.

3. (Not later than 3 business days before the CMC). Lead counsel for each party shall meet and confer (either in person or by telephone), to discuss whether they believe the Court's default Scheduling Order and default Discovery Limits are appropriate for this case, and any issues relating to the management of this case they intend to raise at the CMC.
4. (Two weeks after the CMC). The Parties shall submit an agreed Scheduling Order. If the parties cannot agree, the parties shall submit a separate Joint Motion for entry of each Order briefly setting forth their respective positions on items where they cannot agree. Absent agreement of the parties, the Plaintiff shall be responsible for the timely submission of this and other Joint filings.
5. (Two weeks after the CMC). Deadline for Motions to Transfer. The Court also adopts the following page limits and briefing schedule for Motions to Transfer:
 - a. Opening – 15 pages
 - b. Response – 15 pages, due 14 days after the Opening brief
 - c. Reply – 5 pages, due 7 days after the Response brief
6. (Seven weeks after the CMC). Defendant shall serve preliminary invalidity contentions in the form of (1) a chart setting forth where in the prior art references each element of the asserted claim(s) are found, (2) an identification of any limitations the Defendant contends are indefinite or lack written description under section 112, and (3) an identification of any claims the Defendant contends are directed to ineligible subject matter under section 101. Defendant shall also produce (1) all prior art referenced in the invalidity contentions, (2) technical documents, including software where applicable, sufficient to show the operation of the accused product(s), and (3) summary, annual sales information for the accused product(s) for the two years preceding the filing of the Complaint,¹ unless the parties agree to some other timeframe.

DISCOVERY

Except with regard to venue, jurisdictional, and claim construction-related discovery, all other discovery is stayed until after the *Markman* hearing. Notwithstanding this general stay of discovery, the Court will permit limited discovery by agreement of the parties, or upon request, where exceptional circumstances warrant. For example, if discovery outside the United States is contemplated, the Court will be inclined to allow such discovery to commence before the *Markman* hearing.

¹ With regard to expired patents, the sales information shall be provided for the two years preceding expiration.

With respect to venue and jurisdictional discovery, the Court generally grants leave for the parties to conduct targeted discovery (including, but not limited to requests for production, interrogatories, and depositions) with regard to motions to transfer venue or motions to dismiss based on lack of jurisdiction. If the parties disagree as to what reasonable discovery limits are, the Court encourages the parties to contact the Court to request a telephonic discovery hearing.

Following the *Markman* hearing, the following discovery limits will apply to this case. The Court will consider reasonable requests to adjust these limits should circumstances warrant.

1. Interrogatories: 30 per side²
2. Requests for Admission: 45 per side
3. Requests for Production: 75 per side
4. Fact Depositions: 70 hours per side (for both party and non-party witnesses combined)
5. Expert Depositions: 7 hours per report³

Electronically Stored Information. As a preliminary matter, the Court will not require general search and production of email or other electronically stored information (ESI), absent a showing of good cause. If a party believes targeted email/ESI discovery is necessary, it shall propose a procedure identifying custodians and search terms it believes the opposing party should search. The opposing party can oppose, or propose an alternate plan. If the parties cannot agree, they shall contact chambers to schedule a call with the Court to discuss their respective positions.

DISCOVERY DISPUTES

A party may not file a Motion to Compel discovery unless: (1) lead counsel have met and conferred in good faith to try to resolve the dispute, and (2) the party has contacted the Court's law clerk (with opposing counsel) to arrange a telephone conference with the Court to summarize the dispute and the parties respective positions. After hearing from the parties, the Court will determine if further briefing is required.

PROTECTIVE ORDER

Pending entry of the final Protective Order, the Court issues the following interim Protective Order to govern the disclosure of confidential information in this matter:

If any document or information produced in this matter is deemed confidential by the producing party and if the Court has not entered a protective order, until a protective order is issued by the Court, the document shall be marked "confidential" or with some

² A "side" shall mean the plaintiff (or related plaintiffs suing together) on the one hand, and the defendant (or related defendants sued together) on the other hand. In the event that the Court consolidates related cases for pretrial purposes, with regard to calculating limits imposed by this Order, a "side" shall be interpreted as if the cases were proceeding individually. For example, in consolidated cases the plaintiff may serve up to 30 interrogatories on each defendant, and each defendant may serve up to 30 interrogatories on the plaintiff.

³ For example, if a single technical expert submits reports on both infringement and invalidity, he or she may be deposed for up to 14 hours in total.

other confidential designation (such as “Confidential – Outside Attorneys Eyes Only”) by the disclosing party and disclosure of the confidential document or information shall be limited to each party’s outside attorney(s) of record and the employees of such outside attorney(s).

If a party is not represented by an outside attorney, disclosure of the confidential document or information shall be limited to one designated “in house” attorney, whose identity and job functions shall be disclosed to the producing party 5 days prior to any such disclosure, in order to permit any motion for protective order or other relief regarding such disclosure. The person(s) to whom disclosure of a confidential document or information is made under this local rule shall keep it confidential and use it only for purposes of litigating the case.

CLAIM CONSTRUCTION ISSUES

Terms for Construction. Based on the Court’s experience, the Court believes that it should have presumed limits on the number of claim terms to be construed. The “presumed limit” is the maximum number of terms that the parties may request the Court to construe without further leave of Court. If the Court grants leave for the additional terms to be construed, depending on the complexity and number of terms, the Court may split the Markman hearing into two hearings.

The presumed limits based on the number of patents-in-suit are as follows:

Limits for Number of Claim Terms to be Construed

1-2 Patents	3-5 Patents	More than 5 Patents
10 terms	12 terms	15 terms

When the parties submit their joint claim construction statement, in addition to the term and the parties’ proposed constructions, the parties should indicate which party or side proposed that term, or if that was a joint proposal.

Claim Construction Briefing. The Court will require simultaneous claim construction briefing with the following default page limits; however, where exceptional circumstances warrant, the Court will consider reasonable requests to adjust these limits. These page limits shall also apply collectively for consolidated cases; however, the Court will consider reasonable requests to adjust page limits in consolidated cases where circumstances warrant. In addition, the Court is very familiar with the law of claim construction and encourages the parties to forego lengthy recitations of the underlying legal authorities and instead focus on the substantive issues unique to each case.

Unless otherwise agreed by the parties, all simultaneous filings will take place at 5:00 p.m. CT.

Page Limits for Markman Briefs

Brief	1-2 Patents	3-5 Patents	More than 5 Patents
Opening	20 pages	30 pages	30 pages, plus 5 additional pages for each patent over 5 up to a maximum of 45 pages
Response	20 pages	30 pages	30 pages, plus 5 additional pages for each patent over 5 up to a maximum of 45 pages
Reply	10 pages	15 pages	15 pages, plus 2 additional pages for each patent over 5 up to a maximum of 21 pages

Conduct of the Markman Hearing.

The Court generally sets aside one half day for the *Markman* hearing; however, the Court is open to reserving more or less time, depending on the complexity of the case and input from the parties. The Court requires submission of technology tutorials in advance of the *Markman* hearing when they may be of benefit. The parties may submit tutorials in electronic form not later than one week before the *Markman* hearing and the Court encourages the parties to aim for tutorials with voiceovers in the 15 minute range. If a party intends to present a live tutorial, the parties should contact the Court to set-up a Zoom or telephonic tutorial to occur at least a week before the *Markman* hearing. In general, tutorials should be: (1) directed to the underlying technology (rather than argument related to infringement or validity), and (2) limited to 15 minutes per side. For the Court's convenience, the tutorial may be recorded, but will not be part of the record. Parties may not rely on or cite to the tutorial in other aspects of the litigation.

The Court will consider the parties suggestions on the order of argument at the *Markman* hearing. However, if the parties do not suggest a different procedure, the Court will allow the Plaintiff to pick the first term and then alternate by term. As a general rule, if one side proposes "plain and ordinary meaning" as its construction or asserts that a term is indefinite, the other party shall go first.

GENERALISSUES

1. The Court does not have a limit on the number of motions for summary judgment (MSJs); however, absent leave of Court, the cumulative page limit for Opening Briefs for all MSJs is 40 pages per side.

2. There may be instances where the submission of substantive briefs via audio file will be of help to the Court. If a party is contemplating submitting a brief via audio file it should contact the Court for guidance on whether it would be helpful to the Court. However, the Court has determined that audio recordings of *Markman* briefs are of limited value and those need not be submitted. The recordings shall be made in a neutral fashion, shall be verbatim transcriptions without additional colloquy (except that citations and legal authority sections need not be included), and each such file shall be served on opposing counsel. The Court does not have a preference for the manner of recording and has found automated software recordings, as well as attorney recordings, to be more than satisfactory. Audio files shall be submitted via USB drive, Box (not another cloud storage), or email to the law clerk (with a cc to opposing counsel) and should be submitted in mp3 format.
3. The Court will entertain reasonable requests to streamline the case schedule and discovery and encourages the parties to contact the Court's law clerk (with opposing counsel) to arrange a call with the Court when such interaction might help streamline the case.
4. The Court is generally willing to extend the response to the Complaint up to 45 days if agreed by the parties. However, longer extensions are disfavored and will require good cause.
5. For *Markman* briefs, summary judgment motions, and *Daubert* motions, each party shall deliver to Chambers one (1) paper copy of its Opening, Response, and Reply Briefs, omitting attachments, no later than one week after the last-filed brief or at least a week before the hearing, whichever is earlier.
6. Plaintiff must file a notice informing the Court when an IPR is filed, the expected time for an institution decision, and the expected time for a final written decision, within two weeks of the filing of the IPR.
7. To the extent the parties need to email the Court, the parties should use the following email address: TXWDml_LawClerks_JudgeAlbright@txwd.uscourts.gov.

ORDERED this 5th day of October, 2020.

ALAN D ALBRIGHT
UNITED STATES DISTRICT JUDGE

APPENDIX A – DEFAULT SCHEDULE

Deadline	Item
7 days before CMC	Plaintiff serves preliminary ⁴ infringement contentions in the form of a chart setting forth where in the accused product(s) each element of the asserted claim(s) are found. Plaintiff shall also identify the earliest priority date (<i>i.e.</i> the earliest date of invention) for each asserted claim and produce: (1) all documents evidencing conception and reduction to practice for each claimed invention, and (2) a copy of the file history for each patent in suit.
2 weeks after CMC	Deadline for Motions to Transfer.
7 weeks after CMC	Defendant serves preliminary invalidity contentions in the form of (1) a chart setting forth where in the prior art references each element of the asserted claim(s) are found, (2) an identification of any limitations the Defendant contends are indefinite or lack written description under section 112, and (3) an identification of any claims the Defendant contends are directed to ineligible subject matter under section 101. Defendant shall also produce (1) all prior art referenced in the invalidity contentions, (2) technical documents, including software where applicable, sufficient to show the operation of the accused product(s), and (3) summary, annual sales information for the accused product(s) for the two years preceding the filing of the Complaint, unless the parties agree to some other timeframe.
9 weeks after CMC	Parties exchange claim terms for construction.
11 weeks after CMC	Parties exchange proposed claim constructions.
12 weeks after CMC	Parties disclose extrinsic evidence. The parties shall disclose any extrinsic evidence, including the identity of any expert witness they may rely upon with respect to claim construction or indefiniteness. With respect to any expert identified, the parties shall also provide a summary of the witness's expected testimony including the opinions to be expressed and a general description of the basis and reasons therefor. A

⁴The parties may amend preliminary infringement contentions and preliminary invalidity contentions without leave of court so long as counsel certifies that it undertook reasonable efforts to prepare its preliminary contentions and the amendment is based on material identified after those preliminary contentions were served, and should do so seasonably upon identifying any such material. Any amendment to add patent claims requires leave of court so that the Court can address any scheduling issues.

	failure to summarize the potential expert testimony in a good faith, informative fashion may result in the exclusion of the proffered testimony. With respect to items of extrinsic evidence, the parties shall identify each such item by production number or produce a copy of any such item if not previously produced.
13 weeks after CMC	Deadline to meet and confer to narrow terms in dispute and exchange revised list of terms/constructions.
14 weeks after CMC	Parties file Opening claim construction briefs, including any arguments that any claim terms are indefinite.
17 weeks after CMC	Parties file Responsive claim construction briefs.
19 weeks after CMC	Parties file Reply claim construction briefs.
20 weeks after CMC	Parties submit Joint Claim Construction Statement. In addition to filing, the parties shall jointly submit, via USB drive, Box (not another cloud storage), ⁵ or email to the law clerk, pdf versions of all as-filed briefing and exhibits. Each party shall deliver to Chambers paper copies of its Opening, Response, and Reply <i>Markman</i> Briefs, omitting attachments. Absent agreement of the parties, the Plaintiff shall be responsible for the timely submission of this and other Joint filings.
23 weeks after CMC (but at least 1 week before Markman hearing)	Parties submit optional technical tutorials. The parties shall also jointly submit, via USB drive, Box (not another cloud storage), or email to the law clerk, pdf versions of all as-filed briefing and exhibits.
24 weeks after CMC (or as soon as practicable)	Markman Hearing at [9:00 a.m. or 1:00 p.m.]
1 business day after Markman hearing	Fact Discovery opens; deadline to serve Initial Disclosures per Rule 26(a).
6 weeks after Markman hearing	Deadline to add parties.
8 weeks after Markman hearing	Deadline to serve Final Infringement and Invalidity Contentions. After this date, leave of Court is required for any amendment to Infringement or Invalidity contentions. This deadline does not relieve the Parties of their obligation to

⁵ To the extent a party wishes to use cloud storage, the parties should contact the law clerk to request a Box link so that the party can directly upload the file to the Court's Box account.

	seasonably amend if new information is identified after initial contentions.
12 weeks after Markman hearing	Deadline to amend pleadings. A motion is not required unless the amendment adds patents or patent claims.
26 weeks after Markman	Deadline for the first of two meet and confers to discuss significantly narrowing the number of claims asserted and prior art references at issue. Unless the parties agree to the narrowing, they are ordered to contact the Court's Law Clerk to arrange a teleconference with the Court to resolve the disputed issues.
30 weeks after Markman hearing	Close of Fact Discovery.
31 weeks after Markman hearing	Opening Expert Reports.
35 weeks after Markman hearing	Rebuttal Expert Reports.
38 weeks after Markman hearing	Close of Expert Discovery.
39 weeks after Markman hearing	Deadline for the second of two meet and confer to discuss narrowing the number of claims asserted and prior art references at issue to triable limits. To the extent it helps the parties determine these limits, the parties are encouraged to contact the Court's Law Clerk for an estimate of the amount of trial time anticipated per side. The parties shall file a Joint Report within 5 business days regarding the results of the meet and confer.
40 weeks after Markman hearing	Dispositive motion deadline and <i>Daubert</i> motion deadline.
42 weeks after Markman hearing	Serve Pretrial Disclosures (jury instructions, exhibits lists, witness lists, discovery and deposition designations).
